ULTRAFILTRATION+

WHOLE HOUSE

SYSTEM

The Campbell Ultrafiltration+ Whole House System is professionally installed where the water line enters your home. MicronGuard™ filtration technology provides your family with industry-leading protection from harmful contaminants.

System Size: 2.5" x 10"
Model # CT101-02 / CT101-02D
System Size: 2.5" x 20"
Model # CT202-02 / CT202-02D

Turbo Descaler Option

ULTIFILTR20PLUS is certified by IAPMO R&T against NSF/ANSI 42, 53, 61 and 372 for Particulate Class I, Chlorine Taste and Odor, Total PFAS reduction and Lead Free Requirement.

Safer, cleaner water at every source in your home.

Is your filtration system providing enough protection from harmful contaminants in drinking water? There are new concerns everyday about something in water that shouldn't be: heavy metals, bacteria, viruses, forever chemicals.

Meets the NSF/ANSI 53 2022 standard for PFAS/Forever Chemicals reduction at 20ppt.

The Campbell Ultrafiltration+ Whole House System, provides cleaner safer water at every source in your home. Never worry about the water in the tub or the water used to wash your dishes. It's all filtered.

We say plus after ultrafiltration for a reason, this system removes more than standard ultrafiltration. This technology was developed and proven in the medical and dental industries where safety is vital. Now available for the first time for home use.

Maximum protection for the whole family.

ULTRAFILTRATION⁺

WHOLE HOUSE

SYSTEM

What does it do?

Filtration abilities beyond Ultrafiltration without a pressure drop, this POE system insures safer, cleaner water at every source in your home. This system available in 2.5" x 10" and 20" models, brings cutting-edge filtration technology, proven in the medical and dental industries, to your home.

3-Stage Point of Entry System Reduces Harmful Contaminants. Leaving Safer Cleaner Water

How does it work?

MicronGuard™ enhances the filtration ability of the filter. The base media was developed for NASA space vehicles. Simply put, it uses new technology to remove far smaller things from water than any filter alone would be capable of while maintaining the flow rate.

REDUCES	<ul style="list-style-type: none"> Bacteria 99.99% Viruses 99.99% Cysts 95% Forever Chemicals 95% PFAS (PFOA, PFOS, PFHxS, PFNA, PFBS, PFDA) Heavy Metals ≥85% (Lead, Copper, Iron)
REDUCES	<ul style="list-style-type: none"> Pharmaceuticals Microplastics Particulate Chlorine Scale
AND MORE	<ul style="list-style-type: none"> No wastewater Improves taste & odor No added salt Keeps Calcium & Magnesium in drinking water Certified to NSF/ANSI 42, 53, 61, and 372 Designed and assembled in the USA Flow rate of ≥8 GPM (2.5" x 20") Meets 2022 PFAS reduction standard at 20ppt

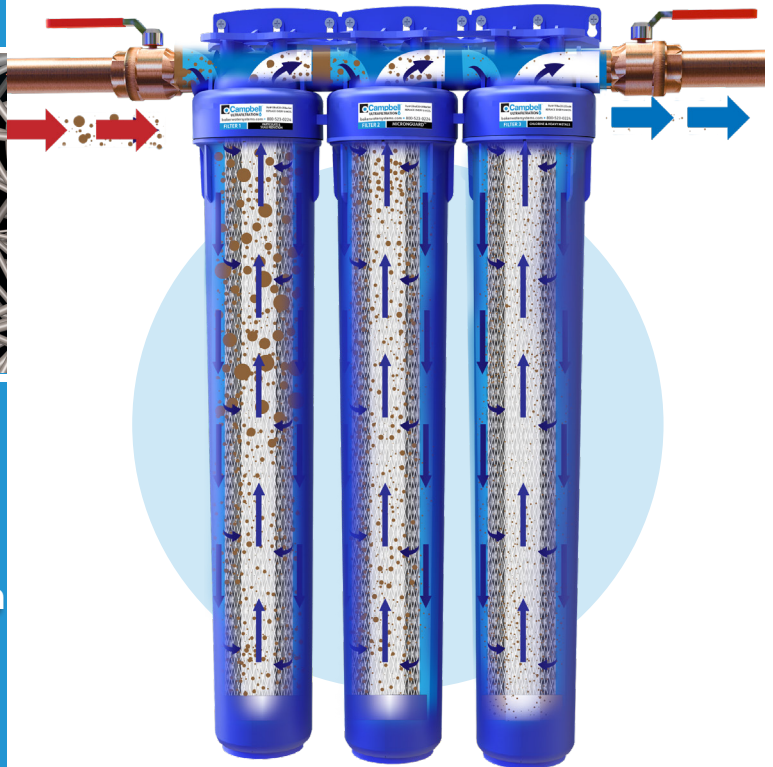

PARTICULATE & SCALE REDUCTION
Optimized dirt holding capacity traps large particulate. This cartridge also reduces scale.

MICRONGUARD
Proprietary filter technology reduces bacteria, viruses, cysts, forever chemicals/PFAS, and heavy metal particulate.

PFAS & CHLORINE REDUCTION
High capacity carbon block filter reduces chlorine, improves taste & odor; additional reduction of forever chemicals/PFAS, and other contaminants.
