Powered by **ULTRAFILTRATION**

UNDER SINK INLINE

How Does it Work?

MicronGuard™ enhances the filtration ability of the filter. The base media was developed for NASA space vehicles. Simply put, it uses new technology to remove far smaller things from water than any filter alone would be capable of while maintaining a high flow rate.

- Bacteria 99.99%
- Viruses 99.99%
- Cysts 99.95%
- Forever Chemicals 95% PFAS (PFOA & PFOS)
- ♦ Heavy Metals ≥85% (Lead, Copper, Iron)
- **Microplastics**

AND MORE

- Easy to install & maintain
- Certified to NSF/ANSI Standards 42, 53, 372
- Designed and assembled in the USA
- Flow rate of 2.2 GPM at 60 psi

ULTUNDERSINK is certified by IAPMO R&T against NSF/ANSI 42, 53 and 372 for Particulate Class I, Cyst, PFOA/PFOS reduction & Lead Free requirement.

Safer cleaner water where you need it most.

Get cleaner, safer water, with a significant reduction in harmful bacteria and contaminants where you need it most with the Campbell Ultrafiltration+ Under Sink Inline Filter. The exceptional point of use filtration technology developed and proven in the medical and dental industries is now available for home use.

This small (6" x 2") yet mighty filter can be used under the sink, in RVs and boats, or for the refrigerator water dispenser.
